## 2. REBATE APPLICATION CHECKLIST

**This program offers rebates for the purchase of new energy-efficient products. Reconditioned or refurbished equipment is not eligible for a rebate. Use this checklist to complete the steps to receive your rebates:**

1. Read the following terms and conditions to determine if you are eligible for a rebate:
  - Only one service address per application.
  - The Utility reserves the right to apply rebates to past due accounts. Rebates \$75 and under will be applied to your account. Rebates will not exceed the purchase price.
  - Energy-efficient equipment must be connected to an electric service supplied by Austin Utilities, Owatonna Public Utilities, or Rochester Public Utilities and is subject to inspection.
  - Equipment installations must meet our Minimum Efficiency Requirements to qualify for a rebate. Air-Conditioning, Heating, and Refrigeration Institute (AHRI) and ENERGY STAR® standards are used. (Please refer to the appliance, lighting, or HVAC rebates sections of this form for requirements and reference sources.)
  - Due to limited funding, this rebate offer can be withdrawn at any time without notice. Applications will be processed on a first-come, first-serve basis. All applications from the previous year's purchases (2016) must be received by March 31, 2017.
  - Rebates can only be offered on equipment that is installed while funding is in effect. In the event our program is discontinued due to depleted funds, we will not provide a rebate for items installed between the discontinued date and the end of that year.
2. Purchase and install new products with the ENERGY STAR® label or that meet our MINIMUM EFFICIENCY REQUIREMENTS.
3. Complete the application, making sure to fill out all required sections in detail. Missing or incorrect information will increase the processing time.
4. Include a final, detailed copy of the original sales receipt, invoice, or picking slip showing the customer name, date of sale, manufacturer name, model number, size, and date of installation.
5. For CFL and LED rebates, applicant must also include the portion of the packaging showing the ENERGY STAR® logo, manufacturer, model number, bulb wattage, and number of bulbs or fixtures.
6. For RECYCLING rebates, applicant must also include proof of recycling from retailer or county recycling center showing the fee paid. The recycling bonus rebate cannot be combined with any other recycling rebate.
7. Sign the application.
8. Mail completed forms and required documentation to your utility provider:

Water-to-Water Heat Pumps: EER greater than or equal to 16.1 and COP greater than or equal to 3.1 (must also be AHRI Certified)**

REBATE: \$200 per Ton + \$150 per EER over Minimum Efficiency Requirement + \$250 per desuperheater

NOTE: MULTI-STAGE MODELS MAY MEET MINIMUM EFFICIENCY REQUIREMENTS BASED ON THE FOLLOWING:

- EER = (highest rated capacity EER + lowest rated capacity EER) / 2
- COP = (highest rated capacity COP + lowest rated capacity COP) / 2

BUT REBATE CALCULATION WILL STILL BE BASED ON FULL LOAD TONS AND FULL LOAD EER BY AHRI.

(AHRI=Air-Conditioning, Heating, and Refrigeration Institute – www.ahridirectory.org)  
(EER=Energy Efficiency Rating)  
(COP=Coefficient of Performance)

**Water-to-Air Heat Pump:** The efficiency ratings are determined using the Air-Conditioning, Heating, and Refrigeration Institute's (AHRI) directory, which may be found at www.ahridirectory.org. EER rating is at ISO 13256-1 cooling conditions of 77°F entering water temp. and 80.6°F dry bulb/66.2°F wet bulb entering air temperature (ground loop heat pump).

**Water-to-Water Heat Pump:** The efficiency ratings are determined using the Air-Conditioning, Heating, and Refrigeration Institute's (AHRI) directory, which may be found at www.ahridirectory.org. EER rating is at ISO 13256-2 cooling conditions of 77°F entering water temp. and 53.6°F leaving water temperature (ground loop heat pump).
